Chieri Abe

(650) 785-3010 | chieriabe518@gmail.com | linkedin.com/in/chieriabe/ | chieriabe.vercel.app | Mountain View, CA

EDUCATION

Carnegie Mellon University Silicon Valley | MS in Software Management **Aug 2026 - Dec 2027**

- Relevant Coursework:Architecture & Programming Principles, Product Leadership, Product Management

Menlo College | BS in Entrepreneurship and Innovation (Minor in Business Analytics) **Aug 2021 - May 2025**

- Relevant Coursework: Business Analytics, Data Visualization, Design Thinking, Sustainable Product

WORK EXPERIENCE

Google | Solutions Consultant | Sunnyvale, CA **Aug 2025 - Apr 2026**

- Built a categorization system for support-ticket comments and joined it with account-level data into a unified data model, powering a real-time dashboard surfacing individual contributions and category-level BI for team goal-setting.
- Developed another BI dashboard to analyze support data for Google's 'Brand Profile' product, identifying a single root cause behind **63%** of ticket volume; the analysis directly reshaped engineering roadmap priorities.
- Managed portfolio of 409 clients across EMEA and APAC, unlocking **50K+ offers** and **109M+** monthly impressions.
- Scaled the Vehicle Ads program into Japan by localizing materials and training 30+ sales managers on new workflows.

Bery LLC | Founder & CEO | Palo Alto, CA **May 2025 - Apr 2026**

- Delivered **12** events across 5 cities (100+ avg. guests) by owning logistics, partner relations, and omnichannel marketing.
- Orchestrated the selection lifecycle for 280+ startups, facilitating their progression through a 4-phase investment funnel.
- Drove **183K+ impressions** at a 7.16% engagement rate by directing a digital marketing strategy for a venture studio.

Capy Inc. | Business Development Representative | San Francisco, CA **Feb 2025 - Jun 2025**

- Improved sales visibility by redefining KPIs and building a new reporting dashboard for leadership decision-making.
- Saved **30+ hours** of manual work monthly by assembling an AI tool suite to automate the full sales cycle.

Hilton | Ecommerce Growth Intern | Tokyo, Japan **Oct 2023 - Jun 2024**

- Boosted CTR to **8% (3% above benchmark)** by launching a new promotion approach that engaged 453,000+ followers.
- Cut team workload by **10+ hours** monthly by identifying and eliminating low-yield mailing-list work (84 lists/month across 21 properties) from a manual bi-weekly review-solicitation process.

Owned | Web Engineer Intern | Tokyo, Japan **Sep 2023 - Oct 2023**

- Automated transaction processing by building a Stripe-integrated system (PHP/SQL) with Slack-based error monitoring.
- Streamlined customer lookups for support agents by centralizing data through internal DB and Zendesk API integration.

PROJECTS

BMO (Solo Hardware Project) | chieriabe.vercel.app/bmo **May 2026 - Present**

- Building a fully local, multimodal agentic robot (Raspberry Pi) from scratch that mimics BMO from Adventure Time.
- Designed and 3D-printed the body and assets, collected and assembled the hardware, and trained BMO's voice model.
- Architected a modular, end-to-end system design, breaking down complex multimodal behaviors into discrete, interacting subsystems (speech/vision processing, facial rendering, game states, decision routing, etc.).
- Cut vision response time **30%** by instrumenting per-stage metrics that exposed bottlenecks across the system, then optimizing both software (e.g. model pre-warming) and hardware (e.g. CPU overclocking + cooling).

University Innovation Fellowship (UIF) | Stanford d.school **Sep 2022 - Aug 2023**

- Designed a multi-year operating model spanning space redesign, equipment deployment, promotion, and governance, establishing an oversight role to ensure sustainable operations beyond the founding cohort.
- Secured **$6K+** in funding by pitching an initiative to campus stakeholders and reframing the makerspace as a strategic campus asset.

SKILLS

Tools: Figma, Tableau, Google Analytics, Notion, Trello, Salesforce, Hubspot
Programming Languages: Python, Typescript, SQL, HTML, CSS
Skills: Product Strategy and Prioritization, Agentic System Design, Model Fine-tuning, Data Analysis
Interest: CAD, 3D Printing, Video/Photo Editing, Robotics, Travel
